## \* Acknowledgement \*

In Bramha Vally College of education Anjaneri, Nashik, we got a practical of writing Blue print of a test paper.

Blue print means to distributes the marks according to the topics, questions types according to their difficulty level.

Blue print helps to distribution of marks in question paper.

To write practical, I am thankful to my professor for their valuable support and the whole staff of Bramha Vally college. For their support

I am thankful to Prof. Mrs. R.A. Bhagat mam for their valuable support.

## \* Introduction \*

For the B.ed course for subject 104 a practical has been taken to consider a blueprint of an subject for unit test and consider for marks system, types of questions, the difficulty level, the number of right question answered.

Taking this all into consideration helps the teacher to analysis the exact paper pattern correctly.

To remove any difficulty to correct up all the question type to use up the knowledge it is important.

Thus each student can be analysed correctly in this method.

## \* Aim of Practical \*

- 1> To consider level distribution of the marks.
- 2> To check the difficulty level of questions.
- 3> To make proper marking systems.
- 4> Distribute marks and objective questions.
- 5> Make unit test paper Blue print.
- 6> Make answer key for the question paper.

## Difficult level of Questions

Difficult Question :  $\frac{R}{N} \times 100$

R: Question answered right by students

N: Total Number of students

Q.1] Write the Roman numeral of given numbers.

- ① 4      ② 6      ③ 10      ④ 7

$$\Rightarrow \frac{R}{N} \times 100$$

$$\Rightarrow \frac{34}{40} \times 100$$

$$\Rightarrow 85\%$$

Difficulty level is very simple of this question.

Q.2 Solve the following example.

a) add the following

1)  $1,43,057 + 4,21,689$

2)  $26,42,073 + 7,39,478$

3)  $40722 + 13819$

4)  $56427 + 10648$

$$\Rightarrow \frac{R}{N} \times 100$$

$$\Rightarrow \frac{25}{40} \times 100$$

$$\Rightarrow 62.5\%$$

∴ Difficulty level is simple of this question.

b) Subtract Following

$$\textcircled{1} \quad 405825 - 9876$$

$$\textcircled{2} \quad 252011 - 218950$$

$$\Rightarrow \frac{R}{N} \times 100$$

$$\Rightarrow \frac{10}{40} \times 100$$

$$\Rightarrow 25\%$$

∴ Difficulty level of this question is very hard.

Q.3 Solve the following examples:-

a) Multiplication :-

$$\textcircled{1} \quad 754 \times 368$$

$$\textcircled{2} \quad 3429 \times 507$$

$$\Rightarrow \frac{R}{N} \times 100$$

$$\Rightarrow \frac{15}{40} \times 100 \Rightarrow 37.5\%$$

∴ Difficulty level is high

b) Divide :-

$$\textcircled{1} \quad 4254 \div 25$$

$$\textcircled{2} \quad 9783 \div 32$$

$$\Rightarrow \frac{R}{N} \times 100$$

$$\Rightarrow \frac{36}{40} \times 100$$

$$\Rightarrow 45\%$$

Difficulty level is hard

Q.4 (a) Give the following answer.  
① What is radius? ② What is chord?  
③ what is diameter?

$$\Rightarrow \frac{R}{N} \times 100$$

$$\Rightarrow \frac{40}{40} \times 100$$

$$\Rightarrow 100\%$$

Difficulty level of this questions is very simple

b) Draw circles with the radii given below.

1) 2 cm      2) 4 cm

$$\Rightarrow \frac{R}{N} \times 100$$

$$\Rightarrow \frac{36}{40} \times 100$$

$$\Rightarrow 90\%$$

∴ Difficulty level of this question is very simple.

c) Complete the following table by filling in the blanks

|          |      |       |      |       |
|----------|------|-------|------|-------|
| Radius   | 4 cm |       | 9 cm |       |
| Diameter |      | 16 cm |      | 22 cm |

$$\Rightarrow \frac{R}{N} \times 100$$

$$\Rightarrow \frac{R}{\frac{40}{40}} \times 100 \Rightarrow 100\%$$

Difficulty level of this questions is very simple.

## \* Educational Implication \*

By taking 20 marks of test paper of unit test of any student of any standard we have to observe the marking system of those lessons should be equally distributed in all the areas of knowledge, planning & understanding.

All the question are from the student point of view even we checked the difficulty level of each question

## \* Overall Impression \*

The university of savitribai phule include the practical of Blue print of the paper revised B.Ed syllabus.

The subject of practical was "Assessment & Evaluation for learning" so for this practical I analized & referred the question paper & text book of std IV<sup>th</sup> math subject.

I got an idea of setting question paper based on knowledge, Application skills understanding by this practice. Also got an opportunity to learn the lesson wise mark distribution.

This practical is very much helpful for me from teachers point of view as evaluation is the most important tool of knowledge & understanding.
